BOMB JACK, a lovable little character is destined to be ranked with super heroes. Controlled by the joystick for direction and the button for leaping, BOMB JACK must travel through periods of history risking his life in effort to collect bombs for points.

Fortunately for BOMB JACK his controls enable him to take mighty leaps, to stop in mid-air, to remain where he is, to change his direction, and his speed of descent. Given these responsive controls his missions are challenging experiences, and his collections remain consistently high.
